

IDS JOB-SEEKER

IDS JOB-SEEKER - online job searching platform (Reactjs)

IDS JOB-SEEKER is a web application designed to connect job seekers with job opportunities. It provides a user-friendly platform for candidates to search for jobs and apply, while employers can post job listings and manage applications.

Features :

- User-friendly interface for seamless job search and application process.
- Differentiated profile pages for employers and candidates, allowing personalized actions and management.
- Integration of React and Redux for efficient state management and organization of CSS.
- Implementation of i18n (internationalization) for translation support in Arabic and English languages.
- Responsive design to ensure optimal viewing experience on various devices and screen sizes.
- Use of local storage to securely store login user data and job-related information.
- Dummy data implementation for ease of testing .

Getting Started :

follow the instructions provided in the **HowToUse.pdf** guide Or **HowToUse.md**

Live Application

You can experience the **IDS JOB-SEEKER** application live by visiting the following link:

<https://chakeryaakoub.github.io/Job-seeker-app/>

Please note that the live application may have limited functionality compared to running it locally.

Accounts:

IDS JOB-SEEKER supports different account types:

- **Candidate:** Candidates can search for jobs, apply, and manage their applications.
- **Employer:** Employers can post new job listings, view and manage applications.

Please see the [Accounts] section for the available account credentials in the HowToUse.pdf guide

If you have any questions or concerns about IDS JOB-SEEKER, please feel free to reach out to the project organizer:

- **Chaker Yaakoub - Full-stack developer**
- **Email : chakeryb.work@hotmail.com**

They will be more than happy to assist you with any issues you may have.

Thank you for your interest in our project.
